

## BASEBALL SPECIFIC EVALUATION

EXACT provides players a complete assessment using advanced **EXACT** technology: For Baseball, we have developed a system focused on the five tools; Speed, Power, Arm Strength, Fielding, and Average.

As Baseball is 90% Mental, EXACT provides scouts with a more complete understanding of a player's mental ability: Our psychological test provides in depth information on players attitudes and motivations. Our mental evaluation tests a player's interactive spatial awareness and ability to process information.

When EXACT tests are integrated with team scouting information, EXACT is a powerful tool that can be utilized to predict individual and team success.

<b>ATTITUDES/ CHARACTER</b>		Our psychological evaluation is correlated to every element of success on and off of the baseball diamond. This computer-based questionnaire measures motivation, competitiveness, impulse control, leadership, persistence, coachability, stress management, responsibility, confidence, and training attitudes.
<b>BASEBALL AREA</b>	<b>ATHLETIC AREA</b>	<b>EVALUATION TECHNOLOGY</b>
<b>SPEED</b>	Explosive & Acceleration Speed	Sixty yard dash, divided into 2, 5, 10, 30, 40, and 60 yard intervals 1. (0-2, 2-5) Measures explosive power (key for stealing bases) 2. (5-10, 10-30) Measures acceleration 3. (30-40,40-60) Measures ability to maintain top speed
<b>POWER</b>	Upper Body Power	1. Seated medicine ball throw, using Doppler radar 2. Bat Speed (measured using Doppler radar) 3. Hand Grip
	Lower Body Power	1. Vertical jump, using electronic sensor mat (Pure lower body power) 2. Sixty yard dash results for explosive power
<b>ARM STRENGTH</b>	Upper Body Power	1. Arm Strength (measured based on positional needs using radar) A. Pitchers Measured from Pitching Mound B. Infielders measured from position C. Outfielders measured from Center Field 2. Hand Grip
<b>FIELDING</b>	Agility	Hexagonal obstacle using infrared sensors
	Scouting	Scouting data provided by team
	Mental Efficiency	Interactive spatial awareness, concentration, and memory assessment
<b>BATTING AVERAGE</b>	Upper Body Power	1. Hand Grip 2. Bat Speed
	Lower Body Power	1. Vertical Jump 2. Sixty Yard Dash
	Scouting	Scouting Data Provided by Team
	Mental Efficiency	Interactive spatial awareness, concentration, and memory assessment
